

## Drops of Sustainable Development

### Moving into the Testing Phase

Welcome to the place where you can explore all updates, results, and activities of the Drops of Sustainable Development project.

Over the past months, the partnership has developed the training structure, collected 24 good practices, and launched the first version of the online learning platform with modules and interactive exercises. We are now preparing for the Learning, Teaching and Training activity in Zaragoza at the end of March, where educators will test the materials and platform to finalise the programme.

Stay tuned – we look forward to sharing more with you very soon.
